

## **CYBER SECURITY**

*ensuring constant verification and data integrity*

## **DATA MANAGEMENT**

*total control, exploit data and be on the leading edge*

**ONE** solution  
for **infrastructure** and **security managers**  
to *seamlessly manage two worlds*

 data rover  
Your data, your success.

**Enhances and Protects the Business**

**DATA ROVER** is an **innovative, robust, and scalable SW solution** for any business.

It allows data users to explore, manage, process and protect their data effectively and efficiently, by simultaneously addressing the 2 primary needs related to the use of data:

***“Never take it for granted your business data is managed properly”.***

## **YOUR DATA**

(YOU CREATE IT + YOU EXPLOIT IT) **x** (WE EXPLORE IT + WE PROTECT IT) = **TEAMWORK AND GROWTH**

For a company to thrive, the organisation must collect and work information.

The exponential growth in data becomes increasingly difficult to govern over time and by default results in a significant wastage of resources, not to mention the ultimate carbon footprint explosion.

**DATA is a highly desirable Asset and a highly undesirable Problem to Manage.**

# **Control the environment ELIMINATE THE RISK**

**Who** are the top producers and offenders

**What** is the growth rate

**How** much is dormant or abandoned

**How** productive are the Business Units

**Know** the data types you have

**How** much is there

**Where** it is across the organisation

**What** is pertinent vs junk/illegal

# DATA MANAGEMENT CYBER SECURITY

**Identify** unauthorised access and misconfigurations to business data

**Determine** who can access what and establish/correct user permissions

**Set up** new environments according to corporate policy

**Monitor** data development and user behavior

**Who** modified the content of files

**Who** copied from where to what and when

**Who** transferred or deleted file(s) or folders

**Make** data shareable safely and trackable

**Rollback** permission settings in time

**Reports** for compliance and auditing

**Data Rover** has been designed for any company that considers data vital to its existence and success.
